

Is your business **SECURE**?

- Is your security monitored 24-hours-a-day?
- Do you have a full-time employee with network security expertise?
- Are your security logs reviewed daily for analysis and data archiving?
- Do you respond to network attacks at 2 AM?
- Are your employees abusing Internet privileges?

24/7 MANAGED & MONITORED PROTECTION for **YOUR** NETWORK

Overview

Security risks are at an all time high for businesses today. Networks that store sensitive information provide an open door to Hackers, Viruses, Worms, Spyware and employee abuse. For small to medium sized businesses, the costs associated with internally defending todays threats are prohibitive. Telnes Managed Security Service is the answer to complete affordable network security.
