

NATIONWIDE INTERNET SERVICE (Core & Expanded Coverage)

NATIONWIDE BENEFITS

- Service to more locations:
Makes finding DSL/T1 easier.
- Multiple locations one Telnes:
Having service to every office from Telnes makes support and billing simple.
- Rock-solid Reliability:
Network quality you can trust because it is completely redundant.
- Competitive Pricing:
Save money.
- Amplified Support:
A direct line to a real person 24/7. No hassles!

To provide the most complete coverage possible, Telnes offers service out of more than 10,200 central offices. This creates a DSL / T1 footprint that can reach remote locations. If your business has multiple locations you will benefit because you can receive service from a single provider. This eliminates frustrations and provides more complete support in serving current and future locations.

How are Telnes Core and Expanded Services different?

Telnes offers **Core services** out of more 3,200 central offices. These service areas represent more heavily populated markets where we can offer the lowest prices and quickest installations.

Our **Expanded service** is also extremely reliable because of redundancy and the quality of the networks it rides over. Because Expanded services are in smaller markets and/or more remote areas, prices fluctuate by location and installations can take longer because the installation process is more complex.
